Brilliant AkriL

In so many ways, 'brilliant' is the only word that can sum up AkriL's great qualities so completely. From the lustre of its surface to the depth of its colour. Brilliant! From its versatility and durability, to its extraordinary practicality on-site. Brilliant! But, perhaps most appealing of all is the superb canvas it opens up for you to create inspired design. Now, that's truly brilliant. See for yourself.

Brilliant ideas shine through.

Environmentally-friendly AkriL comes in a range of designer colours and finishes and is at home in virtually any vertical situation – be it straight, shaped, curved or formed.

You can let your imagination loose in showers, bathrooms and kitchens. Visualise it as cabinet and wardrobe doors. Think commercial fit-outs and shop-fitting, as wall cladding and functional or feature walls. Use it for signage and display.

All these qualities combine to give your creativity unparalleled scope. Brilliant!

It performs equally as well on site too. It's available off-the-shelf to cut lead times and there are no special tools or skills required to work it. AkriL is lightweight, comes with a 10-year UV warranty and is very affordable.

With new surfaces, finishes, ranges and colours in the pipeline, you'll find even more ways to let your brilliant ideas shine through.

The low down on a brilliant performer

AkriL is a highly-engineered polymer, enhanced with colour, that offers a new source of design inspiration.

This durable panel was originally developed as a cost effective alternative to painted glass – but its qualities of versatility, flexibility and workability let it stand alone in all kinds of domestic, commercial and display situations.

Having half the weight and being up to 40% more cost effective than painted glass is a great start – but AkriL has so much more going for it.

Its ready availability and ease of installation reduces lead times and delays. It has higher heat distortion than conventional polymers (up to 100° Celsius) which means it has more applications. And what's more, scratches can be polished out. That's brilliant. Please note that AkriL is not designed to be installed behind cooktops. For this purpose, Nover has stainless steel splashback available in 600 and 900mm widths.

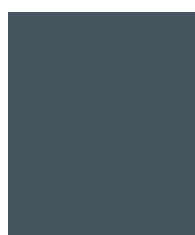

Sheet specification:

Sheet Size	Thickness Available
1000mm x 2000mm	4mm & 6mm
1220mm x 2440mm	4mm & 6mm
1025mm x 3050mm	6mm

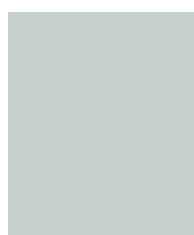

Available in these brilliant colours

We have a range of ten designer colours available in a gloss or frosted matt finish.

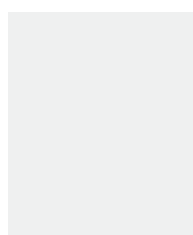

We are also able to colour coordinate to your requirements if you have a large project with specific colour needs.

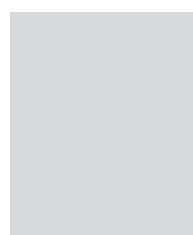

Winter Storm

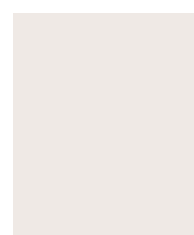

Green Mist

Arctic Breeze

Flamingo

Jet

Features at a glance

- Unique, high-tech polymer
- 10-year UV warranty
- Available off-the-shelf in designer colours
- Can be colour-matched to suit (depending on project scale)
- Durable – abrasion resistant
- Scratches can be polished out
- Easy to work – easy to install
- No special tools or skills needed
- Higher heat distortion (up to 100° Celsius)
- Lighter, more cost-effective than painted glass
- Environmentally friendly – recyclable/ lower energy than glass to produce
- “Good Environmental Choice of Australia” approval
- Builders have on-site control
- 4mm & 6mm thicknesses available
- Highly cost effective
